

ABU DZAR AL GHIFARI

Software Engineer (Full-Stack)

Karawang, West Java, Indonesia | +62817-7675-4044 | abudzar.dev@gmail.com | linkedin.com/in/abu-dzar-alghifari

SUMMARY

Software Engineer with 5+ years of experience delivering full-stack web and mobile applications across fintech, banking, and PropTech industries. Proven track record building end-to-end solutions using ASP.NET (C#) and Node.js on the backend paired with React.js/Next.js/TypeScript on the frontend, including database design, REST API development, and third-party system integration. Comfortable owning a feature from database schema to UI, with strong experience in frontend architecture, unit testing (Jest, React Testing Library), and Agile Scrum delivery.

TECHNICAL SKILLS

- Backend: ASP.NET (C#), ASP.NET MVC / Razor Views, Node.js, Express.js, REST API design, Payment Gateway Integration
- Frontend: React.js, React Native, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3
- State Management: Redux, Redux Saga, Zustand, MobX
- Database: SQL Server, PostgreSQL, MySQL, SQL
- Testing: Jest, React Testing Library
- Design System: Storybook
- Tools & Practices: Git, GitHub, Docker, Azure DevOps, Postman, Agile Scrum

WORK EXPERIENCE

Frontend Developer — PT Sxored Veritas Finansial, Jakarta, ID *Aug 2025 – Present*

- Developed frontend applications for SaaS-based financial verification, appraisal, and risk assessment platforms supporting credit analysis and business due diligence.
- Designed scalable frontend architecture with reusable component structures using React, TypeScript, Zustand, and Tailwind CSS.
- Integrated frontend applications with internal services, third-party APIs, and financial data providers to streamline verification and risk assessment workflows.
- Implemented unit tests with Jest and React Testing Library, and documented reusable UI components with Storybook to improve consistency across products.
- Collaborated with product managers, backend engineers, and QA across e-Statement extraction, SLIK OJK verification, KYB, and fraud detection modules.

Full-Stack Developer — PT Ikonsultan Inovatama, Jakarta, ID *Jun 2021 – Aug 2025*

- Built full-stack web applications end-to-end using ASP.NET (C#) for backend services and React.js for the frontend, including database schema design and business logic implementation.
- Designed and developed REST APIs in ASP.NET and Node.js to support frontend applications, real-time updates, and third-party integrations.
- Architected frontend applications with reusable, maintainable component structures and integrated them with backend services and APIs.
- Implemented real-time notification features to keep users informed of shipment and process status.
- Conducted thorough testing across the application stack to ensure functionality, performance, and reliability.
- Optimized application performance for fast load times, smooth interactions, and responsive UI.
- Worked closely with users and reported progress to the Technical Lead and Project Manager.

Freelance Full-Stack / Frontend Developer — Various Clients, Remote *Nov 2023 – Jan 2026*

- Trakindo e-CSMS: Implemented a full-stack Contractor Safety Management System using ASP.NET MVC with Razor Views, covering certificate request workflows, Microsoft SSO authentication, and compliance scoring for a Caterpillar heavy equipment dealer.
- Suite-3DX BOM Comparator (Confidential Client, Italy): Built the React/Redux frontend for an internal tool comparing machine and Bill of Materials (BOM) versions across JD Edwards (JDE) ERP and Smartone systems, including dynamic forms, conditional fields, and validation.

SELECTED PROJECTS

Sxored Credit Analysis Platform — PT Sxored Veritas Finansial (Frontend) *Aug 2025 – Present*

AI-powered credit analysis and risk assessment platform automating e-Statement extraction, fraud detection, borrower analysis, KYB verification, and collateral appraisal.

Tools: React.js, TypeScript, Tailwind CSS, Zustand, REST API, Jest, React Testing Library, Storybook

PropertyCheck — PT Sxored Veritas Finansial (Frontend) *Aug 2025 – Present*

B2C property valuation platform enabling users to perform property assessments, generate valuation reports, and complete transactions through integrated payment gateway services.

Tools: React.js, TypeScript, Tailwind CSS, Zustand, Payment Gateway Integration, Jest, React Testing Library, Storybook

Suite-3DX BOM Comparator — Confidential Client, Italy (Freelance, Frontend) *Nov 2025 – Jan 2026*

Built the frontend for an internal tool used to compare machine and Bill of Materials (BOM) versions across JD Edwards (JDE) ERP and Smartone systems. Implemented multiple dynamic comparison modules (Smartone comparator, JDE comparator, BOM export/comparator) with conditional form fields, dropdown-driven inputs, field-level validation, and a dashboard navigation structure grouping related tools.

Tools: React.js, Redux

M2U — Maybank Indonesia (Frontend)

Jul 2024 – Aug 2025

Developed digital lending features for personal loan (KTA) applications for invited and regular customers.

Tools: React.js, Dynamo framework, Node.js

Hiregrade — PT. Daya Selaras Group (Frontend)

Feb 2024 – Jul 2024

Built an application connecting job seekers, recruiters, and educational institutions.

Tools: React.js, Redux Saga, Node.js, Jest, React Testing Library

Trakindo e-CSMS (Freelance, Full-Stack)

Nov 2023 – May 2024

Developed a Contractor Safety Management System (CSMS) web application for Trakindo (Caterpillar heavy equipment dealer), enabling vendors to submit and track CSMS certificate requests while internal SHE and procurement teams review, score, and approve submissions. Implemented the full-stack solution end-to-end from existing UI/UX designs using ASP.NET MVC with Razor Views, including vendor/employee authentication (with Microsoft SSO), certificate request workflows, expiry notifications, and detailed compliance scoring views.

Tools: ASP.NET MVC (Razor Views, C#), SQL Server, REST API

Freight Management System — Soerja Kentjana Audris (Full-Stack)

Aug 2023 – Feb 2024

Developed a full-stack Freight Management System for Import Sea and Export Sea operations, building both the ASP.NET backend and React frontend, including real-time shipment status updates and notifications.

Tools: ASP.NET (C#), React.js, SQL Server, REST API

Mobile Platform — PT. Depoguna Bangunan Online (Frontend, Mobile)

Apr 2023 – Aug 2023

Created a mobile application for store (toko) and sales operations.

Tools: React Native, Node.js, Redux

Marketing Compass — PT. Federal International Finance (Frontend)

Dec 2022 – Apr 2023

Developed a web-based application to help clients create and manage marketing programs.

Tools: React.js, Node.js, Redux, MobX, Docker

Mobile Advisor Wealth Management System — Additiv (Frontend)

Aug 2022 – Dec 2022

Digital wealth management platform enabling financial advisors to help clients manage investments, plan financial goals, and make data-driven decisions.

Tools: React.js, Node.js, Redux

Finance e-Form Application — PT. Intraco Penta Tbk (Full-Stack)

Jan 2022 – Aug 2022

Built a full-stack front-office and back-office web application for online vendor payment requests, developing the ASP.NET backend and React frontend to speed up verification and payment processing in the finance department.

Tools: ASP.NET (C#), React.js, SQL Server, REST API

Laboratory & Order Tracking System — PT BMB (Full-Stack)

Jan 2022 – Mar 2022

Developed a web-based application to manage laboratory order status through invoice generation.

Tools: React.js, Node.js, Redux

Ticketing Application — PT Shipper Indonesia (Full-Stack)

Oct 2021 – Feb 2022

Developed a serverless application to handle custom rules on ticket updates and built a custom ticketing portal on Freshdesk.

Tools: React.js, Node.js, Redux, Freshdesk Serverless API

Payment Request Application (Full-Stack)

Jun 2021 – Oct 2021

Developed a web application for the finance and procurement team to manage payment requests.

Tools: React.js, Node.js, Redux

EDUCATION

Universitas Singaperbangsa Karawang — B.S. Informatics Engineering | GPA 3.69

Sep 2016 – Aug 2020

Arkademy Tech Academy — Full Stack Web Developer Bootcamp

Feb 2021 – May 2021 | React.js, Next.js, Express.js REST API, Redux, Socket.IO
